# Jet- Bridge Departure Checklist

HAS-SAF-JBA-003
EFFECTIVE 08/01/2024
AUTHOR: Q&A MGR

Instructions:
This form is to be completed by the JB operator for any flight that requires jet bridge movement. All areas are to be completed clearly by the operator and "N/A" is to be used for any procedure that is not applicable in the station. This form requires to be filed for up to 90 days and is an auditable document.

| AIRLINE AND FLIGHT #: | DATE: | GATE: | BLOCK TIME: | JET BRIDGE USED (circle): L1 L2 L3 |
|---|---|---|---|---|
| | | | | |

Jet bridge driver follows the handling door closure per carrier.
☐ Y ☐ N ☐ N/A

Jet bridge driver removes the safety shoe (if applicable) and stores it in the designated space.
☐ Y ☐ N ☐ N/A

Jet bridge driver places the safety strap and/or closes the roller and or shuts the doors.
☐ Y ☐ N ☐ N/A

The jet bridge driver turns the auto off level on and retracts the canopy.
☐ Y ☐ N ☐ N/A

Jet bridge driver communicates with the spotter with a thumbs up "READY".
☐ Y ☐ N ☐ N/A

The spotter has doubled checked the surroundings for safety, and signals to the driver with a thumbs- up "SAFE".
☐ Y ☐ N ☐ N/A

The jet bridge driver confirms with the spotter by signaling thumbs up "GO" and rings warning bell 3 times before moving the jet bridge.
☐ Y ☐ N ☐ N/A

The spotter is in position observing the detachment of the jet bridge from the aircraft.
☐ Y ☐ N ☐ N/A

While the jet bridge is in motion the spotter ensures and monitors that there are no obstructions in the way until the jet bridge is stationed in the designated safety zone with the wheels inside the stow- box.
☐ Y ☐ N ☐ N/A

Clear jet bridge of trash, water, and debris.
☐ Y ☐ N ☐ N/A

Turn off power.
☐ Y ☐ N ☐ N/A

Ensure all sterile area doors allowing access to the terminal from ramp are securely locked.
☐ Y ☐ N ☐ N/A
