Departure Jet Bridge Checklist

To be completed by the Jet Bridge Operator for flights requiring jet bridge movement. Retain on file for 90 days as an auditable record.

AIRLINE AND FLIGHT #:	DATE:	GATE:	OFF BLOCK TIME:	JET BRIDGE USED (circle): L1 L2 L3

READY
☐ I have confirmed that the aircraft door is closed and the safety strap and/or roller doors are secured.
☐ I have confirmed that the jet bridge path is clear of all personnel before beginning movement.
☐ I have removed the safety shoe (if applicable) and stored it in the designated location.
☐ I have confirmed the jet bridge area is free of personnel, and I am the only individual present before operating the jet bridge (EK only)
SAFE
☐ I have confirmed that the Auto Off-Level system is switched on and the canopy is fully retracted.
☐ I have confirmed that all aircraft service cables have been disconnected and I have received clearance from the spotter to begin movement.
☐ I have completed the local departure process to initiate jet bridge movement (e.g., bell signal or spotter thumbs-up).
GO
☐ I have confirmed that the spotter is in position and actively observing the detachment of the jet bridge from the aircraft.
☐ I have safely moved and parked the jet bridge within the designated safety zone, with the wheels positioned inside the stow box.
☐ I have switched off jet bridge power after parking.
☐ I have confirmed that all sterile-area access doors between the ramp and terminal are secure and locked.
☐ I have completed all required checks and verified that the jet bridge has been safely detached, stowed, and secured in accordance with local procedures.
Record any discrepancies, hazards, or abnormal conditions observed while completing the Ready, Safe, Go process.
In case of an accident/incident, the operator MUST remain at the scene, immediately notify your Airport Authorities. Initial the Incident Checklist with the Station Regional/General Manager. If you have any questions, contact the HQ Safety Manager.
